

## Partners in Action

The birds have found the trusses of our pavilion to be a convenient place to hang out and as a result the picnic tables are becoming laden with bird waste. We need to put a metal ceiling on the pavilion in order to keep them out. We also need to finish the soffit trim on the pavilion before the exposed wood becomes water damaged. You can help by purchasing one or more ceiling panels at \$50.00 each. The purchase of the panels will also cover the cost of installation hardware and the needed soffit material and hardware.

Yes, I want to partner in this project and share in the cost of putting a ceiling in the pavilion and complete the remaining soffit trim by purchasing the following number of sheets.

Number of sheets \_\_\_\_\_ @ \$50.00 each = \$ \_\_\_\_\_

Name \_\_\_\_\_
